

Janestreet is a quantitative trading firm with offices worldwide. We hire smart, humble people who love to solve problems, build systems, and test theories. You'll learn something new every day in our office—whether it's connecting with a colleague to share perspectives, or participating in a talk, class, or game night. Our success is driven by our people and we never stop improving.

We're always looking for people to join us and help come up with our next great idea. We look for people from any background with a curious mind and a passion for technology and creative problem-solving (finance experience is not required!). Join us at our events and find out more about Janestreet.
